

The unique combination of XC Nozzle orifice design and air induction technology means significantly less drift.

Product	Application timing	Sprayer set up and calibration	Fine tuning
40-55%	20-25%	20-25%	10-15%

Selecting the right product is half the battle but putting it on at the right time and accurately is equally important. Fine tuning with nozzle selection can deliver the final 10% to complete the picture and achieve a great result.

Other Syngenta Turf XC Nozzle range availability:						
	Size	Typical water volume (L/ha)	Typical spraying speed (km/hr)	Recommended use		
	025	220 – 400	3-5	Foliar applications on greens and tees		
- Lance	08	450 – 1000	5-7	Wetting agents and soil applications		
For nozzles contact your local Syngenta Agent.						

The rearwards spray angle compensates for the forward movement of the sprayer, delivering better all round coverage of the turf leaf.

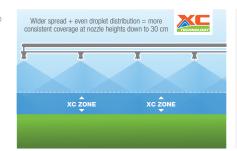

Angled spray

Fit Syngenta Turf XC Nozzles so that the angled spray pattern faces rearwards. Insert nozzles into the bayonet with the Syngenta logo and moulded arrow on the nozzle to the front (facing direction of travel).

Syngenta Turf XC Nozzles fit ISO standard bayonet caps on most sprayers. Hardi sprayers will require bayonet adapters.

Even coverage

Syngenta Turf Nozzles have been specifically designed to cope with and maintain even coverage when spraying undulating ground.
