Select a disease, pest or weed you want to treat with the search bar

Choose recommended product

View product details

# Tank Mix Calculator

**1** Press on "Add saved area" if you have already added an area in your facility info

Repeat the same operation for "Add saved sprayer"

**2** Choose the product you want to apply and indicate the recommended dose rate

Press on "SEE TANK MIX PLAN" to generate the product amount needed

**3** Make the selections and press on "SAVE CALCULATION"

The app interface includes the following elements:

- Screen 1:** "Tank mixing calculator" form with fields for Area Name, Area Size, Tank size, Spraying volume, and Driving speed. A green callout points to the "Add saved area" button.
- Screen 2:** "Tank mixing calculator" form with a list of products. A green callout points to the "Pick product" button.
- Screen 3:** "Pick product" dialog showing "Ascenrity" with a recommended dose rate of 3 Liter/ha. A green callout points to the "ADD" button.
- Screen 4:** "Tank Mix Plan" summary showing "Total consumption" for Water (315.00 Liter) and Ascenrity - UK (105.00 Liter). A green callout points to the "SEE TANK MIX PLAN" button.
- Screen 5:** "Save calculation" screen with fields for Calculation name, Notes, Operator, and Schedule date. A green callout points to the "SAVE CALCULATION" button.
